# CME Group

CME FedWatch API

Easily access CME Group's FedWatch Tool data through a cloud-hosted **REST API** for delivering **JSON**-formatted data directly into your systems for trading, risk management, distribution, or analysis. CME's APIs offer a cloud-agnostic means of access to speed up development time while providing reliable data, directly from the source.

History: 1 year of forecasting history, a list of upcoming FOMC meetings, and a list of prior FOMC meetings with published rates.

Updates: Provides daily forecasts on the Federal target rate for each FOMC meeting, as implied by 30-Day Fed Funds futures pricing data

Easy Integration: Leverage a REST API directly from CME Group to ingest FedWatch data into your systems.

Reliability: Ensure data quality and accuracy by receiving data straight from the source.

For more information on the API specifications, please view here.

Commercials	Price (Monthly)	Licence
Data Fee	$0	Information Licence Agreement (ILA) for Internal Use
Connectivity Fee	$25 / API ID	API Connection Agreement
